iv. Priority Score

Definitions

Access Compliance Survey – Process taken to fulfill the requirements of a Transition Plan, by surveying and identifying physical barriers which impede accessibility to a program or service provided to the public.

Activity Score – Rating that summarizes a feature's expected frequency of use and its impact on individuals with disabilities.

Barrier Score – Rating that summarizes the severity of a feature relative to its deviation from current State and Federal Standards.

Curb Ramp – A ramp graded down from the top surface of a sidewalk to the surface of an adjoining street to provide connectivity within the Public Rights-of-Way.

Facility – A place housing a program or service for the public.

Feature – An element provided in the Public Rights-of-Way, including public sidewalks and streets, crosswalks, curb ramps, street furnishings, pedestrian signals, parking, etc. The four main features surveyed are 1) sidewalks, including gaps, 2) curb ramps, 3) pedestrian signals, and 4) bus stops.

Pedestrian Signal – Devices used at signalized intersections to notify pedestrians when it is safe to cross the street.

Priority Score – Rating that is the summation of both Activity Score and Barrier Score. This rating is used as criteria for determining barrier mitigation schedules that are a requirement of a Transition Plan.

PROW – *Refer to definition of "Public Rights-of-Way (PROW)"*

Public Rights-of-Way (PROW) – Public infrastructure such as streets, roads, or walkways under the responsibility or authority of a public entity, such as a City or County.

Self-Evaluation – A review of a public entity's policies, procedures, and practices in meeting the programmatic requirements of Title II of the Americans with Disabilities Act. The findings of the review and the modifications made as a result must be compiled and shall be made available for public inspection.

Title I – Regulations from the Americans with Disabilities Act specific to employment.

Title II – Regulations from the Americans with Disabilities Act specific to State and local government entities, including City and County governments.

Title III – Regulations from the Americans with Disabilities Act specific to areas of public accommodations and commercial facilities.

Transition Plan - A living document that inventories the physical barriers identified which impede accessibility to a public entity's programs and services. The document will identify solutions to mitigate the barriers and set forth the steps necessary to achieve compliance via a timeline or schedule and designate an official responsible to maintain and update the document. The document is a requirement of the Americans with Disabilities Act and shall be made current and available for public inspection.

Activity Score

An Activity Score is a rating that summarizes a feature's (sidewalk (including gaps), curb ramp, pedestrian signal or bus stop) expected frequency of use and its impact on individuals with disabilities in the Public Rights-of-Way. A rating is assigned to a feature based on that feature's location in proximity to several categories.

In total, the Activity Score is scored on a scale of 0 to 100, with 0 being the lowest activity, and 100 being the highest activity. An Activity Score of 0 indicates that the feature is not expected to see any use by pedestrians based on its location. An Activity Score of 100 indicates that the feature is expected to see significant use by pedestrians due to its location.

The following categories are used to rate an Activity Score for each feature in the Public Rights-of-Way:

Table 1: Activity Score Category Breakdown

Category	Sub-Category	Specifications	Weight	Value	Score
Streets	Arterial & Thoroughfare	Adjacent Class A Street	8	100%	8
	Collector & Residential	Adjacent Class C Street		50%	4
Transit Stops	All forms of Public Transit	Within 1/4 Mile of a Transit Stop	10	100%	10
Schools	Elementary School (Primary Education)	Within 1/4 Mile of Primary Education	10	100%	10
	Middle/Intermediate or High School (Secondary Education)	Within 1/2 Mile of Secondary Education		100%	
Parks	All Parks within the county	Within 1/4 Mile of a Park	10	100%	10
County Attractors	County-Owned Buildings	Within 1/4 Mile of County Buildings	6	100%	6
Pedestrian Generators	Senior Center	Within 1/4 Mile of a Senior Center	10	100%	10
	Medical or Social Services	Within 1/4 Mile of Medical or Social Services		100%	10
Pedestrian District		Within 1/4 Mile of Pedestrian District	10	100%	10
Commercial Corridor		Within 1/4 Mile of Commercial Corridor	8	100%	8
Population Density*	Population per Square Mile in each Census Block, as delineated by the U.S. Census. *Categorized in GIS according to 4 Manual Intervals of 0%, 30%, 60%, and 100%	No Population	10	0%	0
		> 0%-30%		30%	3
		> 30%-60%		60%	6
		> 60%-100%		100%	10
Ped MP Priority		Within PMP Priority Street Segment	8	100%	8
Environmental Justice Community		Within the EJ District	10	100%	10
		Total Weight	**100**		

Barrier Score

A Barrier Score is a rating assigned to a feature (sidewalk (including gaps), curb ramp, pedestrian signal, or bus stops) in the Public Rights-of-Way based on the severity of the feature's existing conditions in comparison to current State and Federal Standards.

In total, the Barrier Score is scored on a scale of 0 to 100, with 0 being a feature that is compliant with current State and Federal Standards, and 100 indicating that the feature is completely noncompliant. All gaps along sidewalks and curb ramps that are required to be installed where there are none currently will be given a score of 100 to classify that they are the highest priority.

Categories used to rate a Barrier Score for each feature in the Public Rights-of-Way are specific to the feature being surveyed (sidewalk (including gaps), curb ramp, pedestrian signal, or bus stops).

The following categories are used to rate a Barrier Score for Sidewalks:

Table 2: Barrier Score Category Breakdown for Sidewalks

Category	Barrier Type	Weight	Quantity**	Value	Score
Heaving/Change in Level	Minor Change in Level (0.26"-0.74")	10	1-2 Incidents	30%	3
			3-5 Incidents	60%	6
			6+ Incidents	100%	10
	Major Change in Level (0.75" or greater)	20	1-2 Incidents	30%	6
			3-5 Incidents	60%	12
			6+ Incidents	100%	20
Cross Slope	Cross Slope Low (2%-5%)	10	10' or less	50%	5
			>10'	100%	10
	Cross Slope Medium (5%-8%)	15	10' or less	50%	7.5
			>10'	100%	15
	Cross Slope High (>8%)	20	10' or less	50%	10
			>10'	100%	20
Run Slope*	Running Slope Low (5%-8%)	2.5	10' or less	50%	1.25
			>10'	100%	2.5
	Running Slope Medium (8%-11%)	5	10' or less	50%	2.5
			>10'	100%	5
	Running Slope High (>11%)	7.5	10' or less	50%	3.75
			>10'	100%	7.5
Obstructions	Obstructions	10	1-2 Incident	50%	5
			3+ Incidents	100%	10
	Total Weight	100			

*Running Slope that matches street grade or less is considered compliant and therefore should receive a score of 0. Any running slope longer than 10 feet is assumed to match the street grade.

** Incidents are the barrier count along a run. For slope data it is the length of the category for the run. A run is usually from one intersection to the next, however a run could end mid-block depending on several factors.

Priority Score

The Priority Score is a summation of both a feature's Activity Score and Barrier Score and is used as a criterion in planning out schedules for the order of barrier mitigation work.

Activity Score + Barrier Score = Priority Score

The Priority Score is rated on a scale of 0 to 200, with 0 being a feature that should have no priority for barrier mitigation work and 200 being a feature which should be at the forefront of any planned barrier mitigation work that uses funds dedicated solely for mitigating accessibility barriers identified in an ADA Transition Plan.

The Priority Score is designed to be equal in scale across the four primary features surveyed in the PROW (sidewalks, curb ramps, pedestrian signals, and bus stops), i.e. a Priority Score of 200 given to a curb ramp is equal to a Priority Score of 200 given to a sidewalk.

Note that the Priority Score serves as only one methodology for creating a schedule. Other methods and criteria can be used (and is encouraged) as the basis for forming a schedule including: 1) barriers identified by constituents through a special request, 2) barriers that overlap with a project already funded and scheduled, 3) barriers that can be resolved internally with maintenance staff, 4) grouping work geographically for cost efficiency, 5) etc.

Documentation for any additional methodology should be kept on record for justifying a barrier mitigation schedule.

APPENDIX H: PRIORITIZATION CRITERIA FOR BARRIER MITIGATION – FACILITIES

Table of Contents

i. Definitions

ii. Priority Score
Table 1: Priority Score Breakdown

iii. Severity Score

Definitions

Access Compliance Survey – Process taken to fulfill the requirements of a Transition Plan, by surveying and identifying physical barriers which impede accessibility to a program or service provided to the public.

Curb Ramp – A ramp graded down from the top surface of a sidewalk to the surface of an adjoining street to provide connectivity within the Public Rights-of-Way.

Facility – A place housing a program or service for the public.

Feature – An element provided in the Public Rights-of-Way, including public sidewalks and streets, crosswalks, curb ramps, street furnishings, pedestrian signals, parking, etc. The four main features surveyed are 1) sidewalks, 2) curb ramps, 3) pedestrian signals, and 4) bus stops

Pedestrian Signal – Devices used at signalized intersections to notify pedestrians when it is safe to cross the street.

PROW – *Refer to definition of "Public Rights-of-Way (PROW)"*

Public Rights-of-Way (PROW) – Public infrastructure such as streets, roads, or walkways under the responsibility or authority of a public entity, such as a City or County.

Self-Evaluation – A review of a public entity's policies, procedures, and practices in meeting the programmatic requirements of Title II of the Americans with Disabilities Act. The findings of the review and the modifications made as a result must be compiled and shall be made available for public inspection.

Title I – Regulations from the Americans with Disabilities Act specific to employment.

Title II – Regulations from the Americans with Disabilities Act specific to State and local government entities, including City and County governments.

Title III – Regulations from the Americans with Disabilities Act specific to areas of public accommodations and commercial facilities.

Transition Plan - A living document that inventories the physical barriers identified which impede accessibility to a public entity's programs and services. The document will identify solutions to mitigate the barriers and set forth the steps necessary to achieve compliance via a timeline or schedule, and designate an official responsible to maintain and update the document. The document is a requirement of the Americans with Disabilities Act and shall be made current and available for public inspection.

Priority Score

A Priority Score is a rating that rates the relative importance of addressing a barrier according to its impact upon the disabled population. The score considers the expected frequency of use and frequency of contact that the barrier will have with the public based on its location within a facility and where the public have access to.

The Priority Score is rated on a score ranging from 1 to 4, 1 being the highest priority, which are barriers that are expected to be in contact with the public consistently, and 4 being the lowest priority, which are barriers with minimal contact by the public. The scoring for the Priority Score is based on the following:

Table 1: Priority Score Breakdown

Priority 1	**Areas of basic public access**
	Accessible routes from site entry points to an accessible building entrance of the program location (EX. walks, ramps, accessible parking spaces, curb ramps, crosswalks at vehicular ways, passenger loading zones, etc.)
	Accessible route from accessible building entrances to “first contact points” (EX. information counters, public lobbies, elevators)
Priority 2	**Access to critical spaces of program function**
	(EX. Classrooms, assembly areas, meeting rooms, public offices, etc.)
Priority 3	**Access to public common areas that support program functions**
	(EX. Restrooms, drinking fountains, public telephones, etc.)
Priority 4	**Staff only areas not expected to be accessed by the public**

Severity Score

A Severity Score is a rating of the degree of deviation that the existing barrier has in comparison to applicable standards and the reparability of mitigating the barrier.

The Severity Score is rated on a score ranging from 1 to 4, 1 being the highest severity, and 4 being the lowest severity. Severity Scores are assigned on a case-by-case basis depending on the type of barrier and the most cost-effective solution to mitigate the barrier.
