SACRAMENTO COUNTY

Americans with Disabilities Act Transition Plan

Working Draft - 2019

Report Prepared by:

Sally Swanson Architects, Inc.
500 Sansome Street, Suite 410
San Francisco, CA 94111
Shao Chen, Project Manager
Michael Paravagna, Program Access Specialist

ACKNOWLEDGEMENT

Sally Swanson Architects, Inc. (SSA) would like to thank Sacramento County staff that were very generous with their time and knowledge, without which, this project would not have been possible.

SECTION I: EXECUTIVE SUMMARY

INTRODUCTION: DEVELOPMENT OF ADA TRANSITION PLAN

The Americans with Disabilities Act (ADA) of 1990 provides comprehensive civil rights protections to qualified individuals with disabilities in the areas of employment, public accommodations, State and local government services, and telecommunications. A primary goal of the ADA is to ensure equal participation in public life for all Americans with disabilities. Title II of the Act covers programs, services and activities of public entities, such as Sacramento County.

The ADA defines “disability” as:

a. a physical or mental impairment that substantially limits one or more major life activities;

b. having a record of such an impairment; or

c. being regarded as having such an impairment.

If an individual meets any one of these tests, they are considered to be an individual with a disability for purposes of the ADA.

Under Title II, a public entity may not deny the benefits of its programs, services, and/or activities to individuals with disabilities by maintaining inaccessible facilities, which house these programs, services and activities. The County's programs, services, and activities, when viewed in their entirety, must be made accessible to and usable by individuals with disabilities, except where to do so would result in a fundamental alteration in the nature of the program; result in undue financial and administrative burdens or threaten or destroy the historic significance of a historic property.

Section §35.150 requires that each program, service or activity conducted by a County, when viewed in its entirety, be readily accessible to and usable by individuals with disabilities. The regulation makes clear, however, that a County is not required to make each of its existing facilities accessible (§35.150(a)(1)). Unlike Title III of the ADA, which requires public accommodations to remove architectural barriers where such removal is "readily achievable," or to provide goods and services through alternative methods, where those methods are "readily achievable," Title II requires a County to make its programs accessible in all cases, except where to do so would result in a fundamental alteration in the nature of the program or in undue financial and administrative burdens. The US Congress intended the "undue burden" standard in Title II to be significantly higher than the "readily achievable" standard in Title III. Thus, although Title II may not require removal of barriers in

some cases where removal would be required under Title III, the program access requirement of Title II should enable individuals with disabilities to participate in and benefit from the programs, services or activities of counties in all but the most unusual cases.

To comply with the Title II requirements for accessibility to County *programs, services and activities*, this Transition Plan:

- Evaluates existing policies, procedures and practices as they pertain to the County's programs, services and activities;
- Provides findings and recommendations with regard to policies, procedures and practices;
- Identifies physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities;
- Assesses the extent of architectural barriers to program accessibility in the public rights-of-way and within the buildings, parks and other facilities operated by the County;
- Describes in detail the methods that will be used to make the facilities accessible;
- Estimates costs for mitigation solutions;
- Specifies the steps necessary to achieve compliance;
- Provides a schedule for barrier removal/mitigation;
- Sets priorities for barrier elimination; and
- Indicates the official responsible for implementation of the plan.

Per 28 Code of Federal Regulations, Part 35; Subpart D – Program Accessibility; §35.150 – Existing Facilities; (d) Transition Plan (1): The County shall provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the development of the transition plan by submitting comments.

In order to satisfy this requirement and to gain the perspective of persons with disabilities, a public meeting was held on _____ at _____PM where members of the public were invited to comment on the County's Draft ADA Transition Plan.

Public vetting is tentatively scheduled for Winter 2019.

OVERVIEW: SELF-EVALUATION OF POLICIES, PROCEDURES AND PRACTICES

In addition to identifying and modifying physical barriers, Title 28 CFR Part 35, ***Non Discrimination on the Basis of Disability in State and Local Government Services***, requires that a public entity evaluate its policies, procedures and practices. The following outlines the County's Self-Evaluation:

- Evaluate County policies, procedures, and practices as they pertain to its programs, services and activities; and make the necessary modifications to those policies and practices that do not meet the programmatic requirements of Title II of the ADA
- Provide an opportunity to interested persons, including individuals with disabilities or organizations representing individuals with disabilities, to participate in the Self-Evaluation process by submitting comments
- Maintain, file and make available for public inspection a list of interested persons consulted, a description of areas examined, and any problems identified, and a description of any modifications made

It is recommended that the County periodically evaluate such policies, procedures and practices pertaining to communication, auxiliary aids and services, emergency response, publications, determination for undue burden, public activities, employment, and new construction of facilities, in addition to physical accessibility to County facilities.

It is also recommended that for program barrier mitigation, a detailed outline of administrative requirements and detailed requirements of needed policies be included. The policy outline would serve as a guideline upon which the County's future policies may be built.

An ADA Self-Evaluation Plan of County services, policies, and practices was completed in 2019. Please contact the County-wide ADA Coordinator for further information regarding the "2019 Sacramento County ADA Self-Evaluation Plan".

OVERVIEW: ACCESS COMPLIANCE SURVEYS OF FACILITIES

The ADA Transition Plan is used to document physical accessibility barriers to the County's programs, services, and activities and to outline a schedule / plan (or the basis to produce one) for which the County shall follow to transition from a state of noncompliance to compliance.

The access compliance surveys of County owned and leased facilities fulfill a portion of the first two requirements of an ADA Transition Plan by identifying existing building conditions that deviate from current State and Federal standards for new construction and providing detailed description of proposed solutions for barrier mitigation. For each barrier, the surveys outline the code deviations and requirements from the Americans with Disabilities Act Accessibility Guidelines (ADAAG), ADA Standards for Accessible Design (ADAS) and the Accessibility Standards in the California Building Standards Code (CBC).

The County has confirmed that California State Parks Accessibility Guidelines (CSPAG) has not been adopted and implemented at County-wide parks and recreation facilities. SSA recommends that the manual be referenced and utilized in planning and implementing regular maintenance activities, and construction projects.

The access compliance surveys of County facilities cover approximately 163 owned and leased facilities maintained by the County. The surveys identified approximately 19,704 different accessibility related barriers within the County facilities and that the financial cost to mitigate all barriers identified in the surveys to be approximately $96 million.

Number of Facilities Surveyed	Number of Accessibility Barriers	Total Cost Estimated ($)
163	19,704	$96,385,212

The County facilities that were surveyed are shown in the table below:

Facility Code	**Facility Name**	**Address**	**City, State, Zip**
00001	Old Administration Building	827 7th Street	Sacramento, CA 95814

Report Production

The following information contains the minimum data included in the Transition Plan – Access Compliance Survey Reports:

- Item number of barrier and/or room numbers, corresponding to schematic site and floor plans
- Area/location of the barrier; for example, room name or number
- Description of the barrier (as-built situation)
- As-is measurement/dimension
- Method of mitigation (e.g. physical alteration, purchase, program modification, equivalent facilitation, etc.)
- Detailed description of proposed solution and, if applicable, an alternative or interim solution
- Code citations, specifying the applicable sections in the State accessibility regulations, and in the Federal standards
- Severity of individual barriers (four levels: 1=severe, 2=moderate, 3=mild 4=minor)
- Unit and estimated unit price
- Total estimated cost for barrier removal
- Special site conditions (if applicable)

The information obtained from the surveys of the County facilities is maintained on a Microsoft Excel spreadsheet database.

Access Compliance Survey Reports are available for review or reference upon request.

Access Compliance Survey Summaries are contained in Section II: Appendix.

SEE Appendix A: Access Compliance Survey Summary of Facilities

Prioritization Criteria for Barrier Mitigation – Facilities

The third requirement of an ADA Transition Plan is to create a schedule that the County shall follow which addresses the order in which barriers shall be mitigated. This schedule shall be a public document and shall be made available for public inspection, maintained, and updated for the duration of the Transition Planning period. The maintaining and updating of this document shall mark the County's good-faith efforts in transitioning from a state of noncompliance to compliance regarding the ADA.

The difficulty and complexity of creating a schedule is recognized. Therefore, to provide a methodology for creating a schedule, a prioritization criterion was formed to rank barriers in order of most important to mitigate first to least important. The prioritization criteria rates each barrier based on two factors, its Priority Score, and its Severity Score. The Priority Score ranks the relative importance of addressing the barrier based on its locational impact on the disabled population, and the Severity Score ranks the barrier based on the degree of deviation exhibited compared to applicable access standards.

Overall Prioritization Criteria according to programmatic functions:

- Importance of the program function
- Frequency of Use
- Program location and relation to other programmatic functions
- Future Projects

Since persons with disabilities utilize certain facilities with greater frequency than other facilities, the impact of barriers identified at those facilities was deemed to be greater. Upon compilation of the survey results, prioritization criteria were determined for barriers identified in the survey and additional information was obtained to determine a final level of prioritization.

Prioritization Criteria according to barrier location:

Priority can be further divided within any one facility depending on the function of the area within the facility being surveyed. Typically, these areas are divided into 4 general priorities.

The prioritization criteria can be used to sort the access barriers identified in the surveys and create a schedule that order barrier mitigation work starting from barriers of highest importance to barriers of least importance.

SEE Appendix H: Prioritization Criteria for Barrier Mitigation – Facilities

Additional Consideration: Age of the Facility

The age of the facility can also determine the County's obligations to meet ADA compliance. Facilities built before September 15, 2010 are obligated to be in compliance with the 1991 ADAAG, barring that the building has not gone through major reconstruction or alteration henceforth that date. The facility will also be required to comply with the applicable California Building Codes (CBC) at the time of construction.

If a facility was constructed or altered between the transition period of September 15, 2010 through March 15, 2012, an option of choosing either the 1991 ADA or 2010 ADA Standards were allowed.

Facilities built after March 15, 2012 are required to meet the updated 2010 ADA Standards as well as the California Building Code (CBC) at time of construction.

The caveat being that crucial program functions and services must be provided in accessible locations.

Compliance Date for New Construction or Alterations	Applicable Standards
Before September 15, 2010	1991 Standards or UFAS
On or after September 15, 2010, and before March 15, 2012	1991 Standards, UFAS, or 2010 Standards
On or after March 15, 2012	2010 Standards

For barriers identified on County property, a 3-pronged approach to implementation is recommended. The Department of General Services, Regional Parks, Waste Management and Recycling would continue to identify the following for remediation:

1. Damaged pathways or trees/shrubs that impede pedestrian access routes either horizontally or vertically;
2. Items readily achievable by the maintenance division, such as relocating, removing accessories, dispensers, furniture, etc. that may reduce access and/or create barriers impeding the use of an area or space;
3. Barriers significant enough in nature as to require additional analysis or budgetary measures.

OVERVIEW: ACCESS COMPLIANCE SURVEYS OF THE PUBLIC RIGHTS-OF-WAY

Barden v. City of Sacramento, 292 F. 3d 1073 established that sidewalks and intersections constitute a service, program, or activity provided by a local agency, therefore sidewalks and intersections are subject to accessibility regulations and should be addressed as part of the County's ADA Transition Plan.

Four different features provided in the Public Rights-of-Way (PROW) were surveyed, including sidewalks, curb ramps, pedestrian signals and bus stops. Curb ramps, pedestrian signals and bus stops were surveyed using a data collection checklist, based on ADA and US Department of Transportation (USDOT) requirements as well as Public Rights-of-Way Accessibility Guidelines (PROWAG) recommendations. Traditional measuring and smart-level equipment were used to collect measurements for these surveys. Sidewalks were surveyed using sidewalk profilers that were developed for the Federal Highway Administration (FHWA) and adapted for sidewalk ADA surveys. The device captures information on slopes, and surface variations and identifies deviations from the required ADA standards and other applicable requirements.

The access compliance surveys of the Public Rights-of-Way (PROW), along with the surveys of County owned and leased facilities, completely fulfill the first two requirements for an ADA Transition Plan. As a part of this effort, approximately 2,091 miles of sidewalk and gaps, 32,071 curb ramps, 2,423 pedestrian signals and 1039 bus stops were surveyed for access compliance and that the financial cost to mitigate all barriers identified in the surveys to be approximately $1.95 billion.

Features	Total Number Surveyed	Total Cost Estimate ($)
Sidewalks	1,950 miles	$1,334,411,307
Sidewalk Gaps	141 miles	$459,690,427
Curb Ramps	32,071 curb ramps	157,060,500
Pedestrian Signals	2,423 pedestrian signals	$13,889,010
Bus Stops	1039 bus stops	$2,353,800
TOTAL		**$1,967,405,044**

Access Compliance Survey Reports are available for review or reference upon request.

Access Compliance Survey Summaries are contained in Section II: Appendix.

Prioritization Criteria for Barrier Mitigation – Public Rights-of-Way

The third requirement of an ADA Transition Plan is to create a schedule that the County shall follow which addresses the order in which barriers within each feature may be mitigated. This prioritization shall be a public document and shall be made available for public inspection, maintained, and updated for the duration of the Transition Planning period. The maintaining and updating of this document shall mark the County's good-faith efforts in transitioning from a state of noncompliance to compliance regarding accessibility.

The relative importance of each barrier, according to its impact upon the disabled population was taken into account when developing the prioritization criteria for barrier mitigation.

Overall Prioritization Criteria according to programmatic functions:

- Special requests from community
- Importance of the program function
- Frequency of Use
- Program location and relation to other programmatic functions

SacDOT maintains special request lists for curb ramps, pedestrian signals, and other access needs. These requests come from community members requesting facilities to accommodate their daily activities. These special requests will continue to be handled as a high priority on an ongoing basis.

Since persons with disabilities utilize certain facilities with greater frequency than other facilities, the impact of barriers identified at those facilities was deemed to be greater. Upon compilation of the survey results, prioritization criteria was determined for barriers identified in the survey and additional information was obtained to determine a final level of prioritization.

The general policy includes the continuous effort of providing the highest priority for sidewalk accessibility connection to existing pedestrian facilities where sidewalk segments are missing.

Prioritization Criteria for PROW according to barrier location:

- Government Services
- County Attractors (County Owned/Leased Facilities)
- Schools
- Parks
- Transit Stops/Centers
- Population Density
- Streets (Arterials, Collectors)
- Pedestrian District
- Commercial Corridor
- Environmental Justice Community
- Pedestrian MP Priority

The prioritization criteria developed for the PROW rates the relative importance of each barrier based on a combination of rating the activity occurring at the barrier's location, or "Activity Score", as well as rating the severity from which each feature deviates from current State and Federal standards, or "Barrier Score". Each score is rated on a scale of 0 to 100, with 0 being the lowest, and 100 being the highest.

The combination of both the "Activity Score" and "Barrier Score" creates an overall "Priority Score" that can be used to sort features identified in the surveys and create a schedule that orders barrier mitigation work starting from features of highest priority to features of lowest priority. The "Priority Score" is rated on a scale of 0 to 200, with 0 being the lowest priority, and 200 being the highest priority.

SEE Appendix G: Prioritization Criteria for Barrier Mitigation – Public Rights-of-Way

Additional Consideration: Age of PROW

The age of the PROW element (i.e. sidewalk, curb ramp, pedestrian signal, or bus stop) can also determine the County's obligations to meet ADA compliance. PROW elements built before September 15, 2010 are obligated to be in compliance with the 1991 ADAAG, barring that the element has not gone through major reconstruction or alteration henceforth that date. The element will also be required to comply with the applicable California Building Codes (CBC) at the time of construction.

If a PROW element was constructed or altered between the transition period of September 15, 2010 through March 15, 2012, an option of choosing either the 1991 ADA or 2010 ADA Standards were allowed.

PROW elements built after March 15, 2012 are required to meet the updated 2010 ADA Standards as well as the California Building Code (CBC) at time of construction.

The caveat being that crucial program functions and services must be provided in accessible locations.

Compliance Date for New Construction or Alterations	Applicable Standards
Before September 15, 2010	1991 Standards or UFAS
On or after September 15, 2010, and before March 15, 2012	1991 Standards, UFAS, or 2010 Standards
On or after March 15, 2012	2010 Standards

For barriers within the public rights-of-way, a 5-pronged approach to implementation is recommended:

1. The County would continue to identify Priority Pedestrian Routes and would provide an implementation schedule for improvements. Removal of any identified barriers would be included in these improvements.
2. The County would identify street sections being resurfaced over the next few years and identify curb ramps that are not compliant with current ADA standards. These identified curb ramps will be scheduled for upgrade to applicable standards as part of a major roadway rehabilitation project involving pavement overlays, cape seal and/or reconstruction; or signal upgrades.
3. The County would identify damaged pathways and trees/shrubs overgrowth into pathway/sidewalks to maintain clearances both horizontally and vertically for pedestrian access routes.
4. The County will continue to allow the option to address service requests made by constituents for ADA improvements of curb ramps, pedestrian signals, bus stops and sidewalks.
5. Identify other agency facilities that create barriers in the right of way (utility cabinets, fire hydrants, utility poles, etc.) and work with the respective agencies to relocate the facilities.

OFFICIAL(S) RESPONSIBLE

The ADA requires that an official be identified as responsible for the implementation of the Entity's plan.

It is the US DOJ's view that compliance with 28 CFR 35.150(a), like compliance with the corresponding provisions of the section 504 regulations for public programs, would in most cases not result in undue financial and administrative burdens on a typical County. In determining undue financial and administrative burdens, all County resources available for use in the funding and operation of County services, programs and activities would need to be considered.

The burden of proving that compliance with paragraph (a) of 28 CFR 35.150 would either fundamentally alter the nature of a service, program, or activity OR would result in undue financial and administrative burdens rests with the County. The decision that compliance would result in such alteration and/or burden must be made by the head of the public entity or their designee and must be accompanied by a written statement of the reasons for reaching that conclusion.

While the US DOJ has acknowledged the difficulty/complexity of not only making such a determination, but also identifying the official responsible to make this decision/determination, the department's intention is clear in that the determination must be made by a high level official, no lower than a Department head, having budgetary authority and responsibility for making spending decisions.

The Official Responsible for the implementation should be able to seek/acquire funding for ADA barrier removal work over the County's Transition Planning period. In most counties, it is the Manager of EEO/Disability Compliance who can effectively control the County's budget line item – "ADA Transition Planning budget". As such, Sacramento County will designate the Manager of EEO/Disability Compliance as the Official Responsible for the implementation of its ADA Transition Plan. They can be contacted as follows.

Cori A. Stillson, Ph.D.

Manager, EEO/Disability Compliance

Sacramento County-wide ADA Coordinator

Department of Personnel Services

700 H Street, Suite 5720 (5th floor)

Sacramento, CA 95814

Main Disability Compliance Phone: (916) 874-7642

FAX: (916) 874-7132

TTY/TDD: (916) 874-7647

dco@saccounty.net

California Relay, 711

Typically, the responsibility of making any particular County program, service or activity accessible to all persons, regardless of ability, rests with the official who controls the operating funds for that particular program, service or activity. To this end, the task of seeking/getting approval for funds from the governing body to make the said program accessible lies with the official responsible for the program.

Indication of the official(s) responsible for implementation of the plan fulfills the final requirement of a Transition Plan.

In support of monitoring and tracking the Transition Plan, the following are officials identified as those responsible for the implementation of the plan at facilities under their departmental jurisdiction.

Sacramento County Department of Transportation (SacDOT)
SacD.O.T. ADA Coordinator
Phone: (916) 874-6291

Department of General Services (DGS)
Jeff Gasaway, Director
Phone: (916) 876-6192

Department of Waste Management and Recycling
Doug Sloan, Director
Phone: (916) 875-6789

Sacramento County Regional Parks
Liz Bellas, Director
Phone: (916) 875-6961

PUBLIC INPUT

Vetting of Transition Plan Results

Notice of Outreach Meeting to Obtain Input

Added at a later date

TRANSITION PLAN IMPLEMENTATION

The document should be maintained and updated for the duration of the Transition Planning period and a copy of the Transition Plan shall be made available for public inspection.

The final product is a working document to be modified as barriers are removed or alterations are made, open to modification throughout the transition period. The Official(s) responsible and project managers overseeing the barrier-removal projects will document all such ADA improvements/upgrades. Also as part of this process, technical infeasibility, if any, to meet necessary accessibility compliance will be documented and filed for the County's records by the Engineer-of-Record on the said project. It is also recommended to provide accessibility site audits (inspections) of on-going projects as part of the project close-out/certification. This documentation and verification of barrier-mitigation will be integrated into the County's ADA Transition Plan on a regular basis to ensure that barriers are "checked-off" and the Plan is current with a record of barrier-mitigation work. Annual reports of barrier-mitigation work may also be provided to the County's Board of Supervisors.

Maintenance of Accessible Features

The Maintenance of accessible features is mandated by State and Federal Regulations and is an integral part of the County's plan to transition into a more accessible destination. Both, Chapter 28 Code of Federal Regulation, Part 35, Section 35.133 as well as the California Building Code section 11B-108 – Maintenance of accessible features, state:

A public accommodation shall maintain in operable working condition those features of facilities and equipment that are required to be accessible to and useable by persons with disabilities. Isolated or temporary interruptions in service or accessibility due to maintenance or repairs shall be permitted.

Both these sections provide that a public entity shall maintain in operable working condition those features of facilities and equipment that are required to be accessible to and usable by persons with disabilities. They require that, to the maximum extent feasible, facilities must be accessible to, and usable by, individuals with disabilities. These sections recognize that it is not sufficient to provide features such as accessible routes, ramps, or elevators, if those features are not maintained in a manner that enables individuals with disabilities to use them. Inoperable elevators, are neither "accessible to" nor "usable by" individuals with disabilities.

It is, of course, impossible to guarantee that mechanical devices will never fail to operate. As such, the 2nd paragraph provides that this section does not prohibit isolated or temporary interruptions in service or access due to maintenance or repairs. This paragraph is intended to clarify that temporary obstructions or isolated instances of mechanical failure would not be considered violations of the ADA or this part. However, allowing obstructions or "out of service" equipment to persist beyond a reasonable period of time would violate this part, as would repeated mechanical failures due to improper or inadequate maintenance. Failure of the public entity to arrange prompt repair of inoperable elevators or other equipment intended to provide access would also violate this part.

A County-wide formal policy specifically addressing the legal requirements (28CFR Part 35.133 & CBC1101B.3) of maintaining accessible features would be of long-term benefit to the County. When, over time, an accessible feature fails, institutionalizing organizational commitments towards protocols and maintenance ensures an appropriate action is taken.

Implementation Policies

Sacramento County proposes the following implementation policies for transition of its facilities and public rights-of-way into compliance with the ADA.

1) The County will dedicate funds solely for mitigation of barrier without obligating funds and a $1.25 million/year Fund for Public Rights-of-Way to be dedicated solely to the mitigation of barriers identified in this Transition Plan.

   Sacramento Regional Transit shares in the cost of improvements to bus stops and is assumed to support on-going ADA improvements at bus stops with an estimate of $0.25 million/year.

2) The County will continue to seek out sources of funding beyond the accounts specified at present, including funds associated with the County's Capital Improvement Project funds, and other Tenant Improvement projects.

3) The County maintains special request list of curb ramps, pedestrian signals and bus stops in the unincorporated County from constituents. The County will give these special requests higher priority when possible.

4) Each time the County overlays or reconstructs a street, it will ensure that compliant curb ramps within the project limits are installed at each intersection as part of the overlay project, insofar as it may be required by law. (This requirement does not pertain to slurry seals, chip seals, skin patch or base failure repairs.) This work will be in addition to the work supported by the pedestrian rights-of-way account.

   The County will include in any slurry sealing work or cape sealing work it performs a requirement to look for excessive build up which can create an inaccessible “lip” in the curb ramp area and grind down any such lips.

   If the County obtains dedicated funding for any additional street overlays or reconstruction, it will ensure that compliant curb ramps are installed at each intersection within the project limits as part of the overlay or reconstruction project, insofar as it may be required by law. If the County obtains dedicated funding for redevelopment work that includes complete removal and reconstruction of a section of pedestrian rights-of-way, the County will endeavor to make the reconstructed sidewalk accessible.

5) The County will monitor any private construction work in the public rights-of-way to ensure that it conforms to standards for accessibility.

   The County will also monitor permitted work for existing driveways to ensure that the driveway modification does not create an unreasonable cross-slope or worsen an existing cross-slope within the path of travel along pedestrian rights-of-way.

6) In addition to the improvements to facilities, parks, bus stops, curb ramps and traffic signals, the County’s Department of Transportation will continue to perform work on an ongoing, routine basis related to maintaining the ramps, sidewalks, bridges, etc. so they are in good condition. Many of these maintenance tasks are beneficial to the disabled population, for example, by reducing trip hazards and keeping sufficient accessible space along sidewalks. Examples of work undertaken include: trimming shrubbery; repairing or grinding sidewalks; ramping raised sidewalks; filling holes; weeding and cleanup of debris; sweeping; repairing tree grates; inspections for needed sidewalk repairs.

7) The Code Enforcement Division Chief has the authority to grant exceptions for “unreasonable hardship” under the California Building Code, Definitions. The section on “unreasonable hardship” includes five factors to be considered:
   1. The cost of providing access.
   2. The cost of all construction contemplated.

3. The impact of proposed improvements on financial feasibility of the project.
4. The nature of the accessibility which would be gained or lost.
5. The nature of the use of the facility under construction and its availability to persons with disabilities.

Existing Policies and/or Standards:

1) The "County Street Improvement Standard" has designated a "Class B Street" as a residential street with curb and gutter but without sidewalks, and a "Class C Street" as a residential street that have no sidewalk, curb or gutter.

2) Traffic/pedestrian light dictates the right of way for both pedestrians and vehicles at signalized intersections. When a signalized intersection has one or more corners without sidewalks, the County provides a pedestrian refuge area to wait for signal change indicating the crossing right of way. The safe refuge is a paved area outside of the vehicular way with raised asphalt concrete (AC) dykes to channel traffic away from the paved refuge area. Cut through level with the street at raised AC dykes are provided to allow for wheelchair passage to the crosswalk.

NOTICE OF COMPLIANCE UNDER ADA & CALIFORNIA STATE LAW

In accordance with the requirements of Title II of the Americans with Disabilities Act (ADA) of 1990, the Americans with Disabilities Amendments Act of 2008, the Fair Employment & Housing Act (FEHA), California Government Code Section 11135 and other applicable codes, the County does not discriminate against individuals on the basis of disability in its services, programs or activities.

Employment: The County does not discriminate on the basis of disability in its hiring or employment practices and will comply with the Fair Employment and Housing Act, as well as Title I of the ADA, including the regulations promulgated by the U.S. Equal Employment Opportunity Commission (EEOC), including the requirement to provide reasonable accommodations.

Effective Communication: The County will generally, upon request, provide appropriate aids and services leading to effective communication for qualified person(s) with disabilities, including sign language interpreters, documents in Braille and other alternate formats to ensure information and communication is accessible to people who have speech, hearing, vision, or cognitive impairments so they can participate equally in the programs, services and activities.

Modification to Policies and Procedures: The County will make reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to participate in all of its programs, services and activities. *For example, individuals with service animals behaving within applicable standards are welcome in offices and County facilities, even when pets are generally prohibited.*

Anyone who requires auxiliary aids and services for effective communication, or a modification of policies or procedures to participate in a program, service or activity in the County should communicate with the responsible Department contact as soon as possible, but no later than **48 hours** before the scheduled event.

Neither the ADA, nor State law requires the County to take action that would fundamentally alter the nature of its programs, activities or services or impose an undue financial or administrative burden. Complaints that a program, activity or service of the County is not accessible should be directed to the **ADA Coordinator:**

Cori A. Stillson, Ph.D.

Manager, EEO/Disability Compliance

Sacramento County-wide ADA Coordinator

Department of Personnel Services

700 H Street, Suite 5720 (5th floor)

Sacramento, CA 95814

Main Disability Compliance Phone: (916) 874-7642

FAX: (916) 874-7132

TTY/TDD: (916) 874-7647

dco@saccounty.net

California Relay, 711

The County does not place a surcharge on a particular individual with a disability or a group of individuals with disabilities to cover the cost of providing auxiliary aids and services or making a reasonable modification to a policy to create access.

ADA GRIEVANCE PROCEDURE

Sacramento County ADA Grievance Procedure

Grievance Procedure under ADA and California State Disability Rights Laws

This grievance procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"), the Americans with Disabilities Amendments Act (ADAAA) and California State law. It may be used by anyone wishing to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs or benefits by Sacramento County. Sacramento County's Disability Discrimination Policy governs employment-related complaints of disability discrimination.

The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of the complainant and location, date and a description of the problem(s). Alternative means of filing a complaint, such as personal interviews or tape recording the complaint, are available to people with disabilities upon request.

The complaint should be submitted by the grievant and/or their designee as soon as possible, but no later than 60 calendar days after the alleged violation to:
